

350 bar 24 l/min

Speedclean 3200Xe

AIR POWERED HIGH PRESSURE CLEANER
Simple, reliable and easy to use

- ▶ The toughest, safest and most efficient pressure washer you can buy
- ▶ Heavy duty low weight high pressure cleaner for professional use
- ▶ Oil lubricated pump packings and low piston speed for superior service life
- ▶ Unique reliability proven through years of service
- ▶ Can handle water up to 150°C

SIMPLE AND ROBUST

The heavy duty Speedclean high pressure cleaners are renowned for efficient cleaning under all types of conditions. The high pressure pump moves only when you spray and the high pressure packings are protected by oil lubrication, features which ensure superior service life. The patented prize-winning motor has two moving parts, only. There are no springs or other mechanical devices and no in-service adjustments are required. The reciprocating motion is controlled by a simple air operated shuttle valve resulting in a very compact unit made up by very few parts. A high quality lubricator ensures correct lubrication at all times. All critical parts are in acid resistant steel or bronze. The result gives you long term trouble free operation.

SAVE TIME

The high pressure delivered by Speedclean means that you can work much faster. A doubling of pressure gives four times higher cleaning speed.

SAFE AND USER FRIENDLY

Compressed air power eliminates any risk of short circuits, fire and explosions. Speedclean is therefore safe to use in any environment and any industry.

Small dimensions, low weight and large wheels makes it easy to handle on uneven surfaces and in tight corners.

ECONOMICAL

Speedclean offers safe and very fast cleaning using a minimum of costly cleaning agents. Just connect the air and hot or cold water and you're ready to go. Ease of use enhances cleanliness and maintenance of your plant. The result is less down time and less depreciation.

TECHNICAL DATA

Speedclean	3200
Pressure ratio	32:1
No of cylinders	2
Capacity (l/min)	0-24
Pump pressure (bar)	0-350
Pressure at 8 bar air (bar)	240
Water temp. (deg C)	0-150
Air consumption (m ³ /min)	0-7.5
Recom. air pressure (bar)	5-11
Water inlet pressure (bar)	0-25
Length (mm)	720
With (mm)	520
Height less handle (mm)	540
Weight (kgs)	55

ENVIRONMENTALLY SOUND

Speedclean handles boiling hot water continually and it is therefore ideal for cleaning and degreasing without undue use of chemicals. Efficient de-greasing normally requires 70-100°C. This is well within the operating range of Speedclean.

STANDARD SCOPE OF SUPPLY

High pressure hose 10m x 3/8"
Heavy duty cleaning gun
Long lance with flat jet nozzle
Nickel and chrome plated steel frame
Efficient silencer and oil lubricator.

OPTIONAL ACCESSORIES

Turbo jet nozzles. Pipe cleaning nozzles
Hose reels. Sand blaster
Air filters, water traps
Filters for inlet water
Selection of hose and lance lengths
Lance on wheels. Spare seal sets
Vibration dampers for fixed installation
Fog nozzles, chemical injectors etc.

Subject to improve without further notice
